ABSTRACT

[0127] A roller apparatus mountable to an ice skate blade. The roller apparatus includes a pair of wheel assemblies having an axle mountable through apertures in a skate guard or a rail mounted over a skate guard which receives an ice skate blade. At least one of front and heel straps are mountable to the skate guard or the rail to releasibly secure the roller apparatus to an ice skate. The wheels are laterally spaced pairs of front and rear wheels or front and rear inline wheels.
